

ZAWAR ZOHAIB

DATA SCIENCE POSTGRADUATE · RESEARCH & FIELD INTERVIEW SPECIALIST · AI-DRIVEN ANALYST

Newport, Wales NP20 2DJ | +44 7405 376702 | zawarzohaib096@gmail.com | Right to work: Student Visa (20 hrs/week, full-time in holidays)

PROFESSIONAL SUMMARY

MSc Data Science candidate (UWE Bristol) with a BS in Statistics and 3+ years of hands-on experience turning real-world data into decisions — from leading door-to-door survey operations across 500+ households for a national government programme, to cutting emergency blood-donor matching time by 40% through database redesign. Combines rigorous statistical training (regression, hypothesis testing, SPSS, R) with practical fieldwork, compliance auditing and stakeholder engagement. Recently designed and built a personal AI-powered career platform in React using the Claude API. Seeking part-time research, data or field-interviewing roles in Newport, Cardiff or remote across the UK.

CORE SKILLS

Research & Fieldwork	Survey design · Structured & door-to-door interviewing · Qualitative data collection · Stakeholder & community engagement · Compliance monitoring & auditing
Data & Statistics	R · SPSS · Minitab · Regression analysis · Hypothesis testing · Data cleaning · Statistical reporting · Python (Pandas, learning)
Tools & Tech	Excel (VLOOKUP, Pivot Tables) · Google Sheets · Database administration · React (basic) · Claude / LLM APIs · MS Office
Professional	Report writing · Data protection & GDPR awareness · Quality control · Team training · Bilingual communication (English / Urdu-Hindi)

PROFESSIONAL EXPERIENCE

Field Compliance Officer & Community Interviewer — 2021 – 2023

Benazir Income Support Programme (BISP) — Government of Pakistan's national poverty-alleviation programme

- Conducted structured door-to-door interviews across **500+ households** in diverse urban and rural communities, collecting sensitive socioeconomic data for national policy decisions.
- Maintained **100% data accuracy** against government protocols through systematic verification, record auditing and on-site compliance checks.
- Designed and delivered financial-literacy sessions (one-to-one and group), translating complex policy into plain language for low-income families — measurably improving programme participation.
- Built trust with community leaders and local stakeholders to raise response rates on sensitive surveys.
- Trained and mentored junior field staff on interview technique, ethical data handling and data-entry standards.

Data Administrator & Coordinator — 2020 – 2021

Hayatian Blood Society — volunteer-run emergency blood donation network

- Owned a live database of **1,000+ donor records** categorised by blood group, location and availability for rapid emergency response.
- Redesigned the data-retrieval workflow, **cutting donor-to-patient matching time by 40%** — directly speeding up emergency responses.
- Screened prospective donors through outreach interviews, capturing accurate medical eligibility data.
- Handled sensitive personal and medical data under strict privacy and confidentiality standards.
- Coordinated volunteer teams across departments to meet urgent, time-critical blood requests.

KEY PROJECTS

Zawar Job — AI Career System (Personal Product Build)

React · Tailwind-style UI · Claude (Anthropic) API · Prompt engineering

Designed and built a full AI-powered job-application platform: an LLM recruitment agent that scores job descriptions against my profile (0–100 match scoring), generates tailored cover letters and interview preparation, plus a live

application-tracking dashboard with pipeline analytics. Authored the product requirements document, system prompts and scoring framework end-to-end.

Predictive Student Performance Analysis

R · Multiple regression · Statistical reporting

Built a multiple-regression model in R identifying at-risk students with **85% predictive accuracy**; delivered a written report with policy recommendations for educational institutions.

Online vs. Physical Learning — Comparative Study

Hypothesis testing · Survey design · Primary data collection

Led an end-to-end research study comparing student engagement and institutional efficiency across learning modalities: designed the survey instruments, collected primary data and presented statistical findings.

EDUCATION

MSc Data Science — Jan 2026 – Jan 2027

University of the West of England (UWE), Bristol — UK

- Core modules: Machine Learning, Statistical Modelling, Data Engineering, Research Methods.

BS Statistics — 2019 – 2023

University of Gujrat, Pakistan

- Key areas: Inferential Statistics, Regression Analysis, Research Methodology, SPSS, Minitab.

AVAILABILITY & LANGUAGES

- **Availability:** Monday, Thursday–Sunday · up to 20 hrs/week in term time · full-time during university holidays.
- **Right to work:** UK Student Visa — authorised for 20 hrs/week.
- **Languages:** English (B2 Upper-Intermediate) · Urdu / Hindi (Native, C1).
